CAREER ACCELERATION PROGRAM

CAP

Mainframe Administration

A personalized, year-long development journey for Mainframe Administration professionals.

ASSESS • DEVELOP • APPLY • GROW

www.ez-learn.global • contactus@ez-learn.global

Build capability. Expand your impact.

A structured development plan aligned to Mainframe Administration responsibilities and career goals.

Perform with confidence

Strengthen day-to-day execution and develop confidence in your current role.

Prepare for the next step

Build skills and perspective for broader responsibilities and future opportunities.

Stay market-relevant

Upskill against evolving Mainframe technologies, tools and workplace expectations.

Program objective

Mentoring and guided practice to help Mainframe Administration professionals grow from day-to-day execution toward stronger technical ownership and solution-oriented thinking.

Who is CAP designed for?

For professionals building or advancing their Mainframe Administration capability.

TARGET AUDIENCE

- Mainframe Operations and Support professionals
- Mainframe Administration professionals
- Mainframe Application Developers moving into Mainframe Administration

EXPECTED OUTCOMES

- Improved execution in the current role
- Confidence to take on new responsibilities
- Upgraded skills to demonstrate at work
- Progress toward technical solution leadership
- Greater market relevance and career mobility

Personalized learning, backed by practice

The program combines mentoring, guided self-learning and hands-on Mainframe practice.

Live and virtual mentoring

Structured sessions with experienced mentors.

Online 1:1 and group mentoring

Individual guidance and collaborative learning.

Guided self-learning

Independent learning between mentoring sessions.

Hands-on practice

Practical work in Mainframe environments.

PROGRAM DURATION

1 year from the date of enrollment

Personal mentor support and CAP Coordinator support are both provided for the full year.

How It Works

A simple, structured approach to plan your career growth

1

Schedule a Call with an SME

We schedule a call with a Subject Matter Expert (SME) to understand your current role, responsibilities and learning requirements.

Understand your needs

2

Complete the Self-Evaluation Checklist

We share a checklist for you to assess your current skills, programming languages and tools.

Assess your skills

3

Receive a Recommendation Report

Our SME team reviews your completed checklist and prepares a report highlighting strengths, skill gaps and recommended focus areas.

Get expert recommendations

4

Follow Your Personalized Plan

A tailored one-year learning plan includes:

- Mainframe ID access for 1 year
- LMS access
- Live instructor-led training
- Self-learning programs
- Personal mentor support for 1 year via WhatsApp group

Start your 1-year journey

Mainframe Administration capability map
