

COURSE ABSTRACT

Course Code

- C021

DELIVERY METHOD

- Ez-Learn Virtual Instructor Led Training (EVILT)

COURSE DURATION

- 10 hours

PREREQUISITES

- None

RECOMMENDED TRAININGS

- None

CONTROL-M (Distributed & Mainframe)

Course Overview

1. Proficiency in managing BMC Control-M Batch Operations.
2. Competence in executing Mainframe Control-M Batch Operations.
3. Work with the Java Collections Framework to store, retrieve, manipulate, and communicate aggregate data.
4. Understanding and implementation of Calendars in Control-M for efficient job scheduling

Target Audience

1. System administrators responsible for batch job management across distributed and mainframe environments.
2. IT professionals seeking to enhance their skills in job scheduling and automation with Control-M.
3. Mainframe operators looking to integrate Control-M into their operational workflows.

COURSE ACTIVITIES

- Managing BMC Control-M Batch Operations.
- Executing Mainframe Control-M Batch Operations.

Control-M LEARNING PATH

<https://www.ez-learn.global/control-m-distributed-mainframe/>

Course Modules

Module 1: Introduction to Control-M
➤ Overview of Control-M and its Capabilities
➤ Control-M Roles and Responsibilities
➤ Introduction to Control-M Interfaces
Module 2: Creating a Job Workflow
➤ Introduction to Workspaces
➤ Specifying Folder and Job Properties
➤ Basic Job Scheduling
Module 3: Defining Job Dependencies and Actions
➤ Creating Job Dependencies
➤ Specifying Notifications and On-Do Actions
➤ Ordering Jobs from Planning Domain
Module 4: Monitoring Jobs
➤ Exploring Viewpoints
➤ Ordering Jobs from the Monitoring Domain
➤ Accessing Alert Information
Module 5: Performing Job Actions
➤ Performing Job Actions in Control-M
